

JARDIN DE LOUIS – WATER SUPPLY AND ELECTRIC HOT WATER.

How to turn on the water:

Behind the front door you will find a metal cupboard, in the door you will see a key for the water (see picture).

The key opens a door opposite the front door of the apartment, which is slightly to the right as you look out of the front door.

Open the wooden cupboard with the key and find the meter marked A33.

Make sure the tap either side of the meter is open, and then check the water is running in the apartment, and then put the key back in the metal door.

How to turn heat the water:

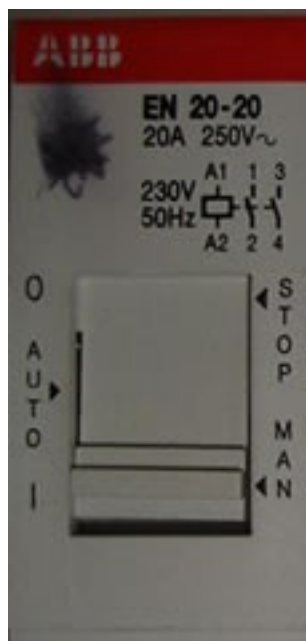

Make sure you have put the water supply on first (to avoid a hot water tank collapse.)

In the same cupboard where you found the water key, you will see the fuse box.

In the top right hand side of the switches you will see a slide switch to heat the hot water tank.

Slide the switch from the top from ZERO/STOP to AUTO in the middle. This will heat the water over night.

If you require hot water straight away then slide the switch to the bottom to MANUAL for a few hours, BUT then remember to return it to AUTO for the rest of your stay.

Thank you
